

International Collaboration with

Collegio San Carlo, Milan, Italy

- **IB Head of School's statement on the international collaboration**

We are delighted to have the opportunity to collaborate with your school on our forthcoming trip. I believe the students will benefit greatly from their interactions and they will enjoy their learning process.

Thank you very much for working with us.

Anne Hallihan

IB Diploma Co-ordinator/Principal

Collegio San Carlo, Milan, Italy

- **The Initiators of the collaboration:**

Mr. Zbigniew Strucki – Italian partner Cooperation Coordinator (strucki@collegiosancarlo.it)

Mrs. Jana Šišmišová – Slovak partner Cooperation Coordinator (jasiska@gmail.com)

- **The outline of the collaboration:**

a. An "initiative group" of few students from each school is formed in early September. Ideally those should be students taking Physics, Geography, or Economics, though that's not necessary.

b. We make sure that the students from both schools get in touch.

c. Those students prepare a poll about the nuclear energy and conduct that poll among the students and teachers at their schools.

d. The results of the poll are then developed to be presented and discussed during the workshop.

e. In the meantime, another group of students from both schools prepare a presentation about the nuclear energy policies and uses in our two countries. Those presentations will then be presented during the workshop as well.

f. Following the four presentations, a discussion would take place, possibly supported by the teachers of subjects that are in some way linked to the topic of nuclear research, or nuclear energy.
